PARVEEN N

Laravel / PHP Backend Developer

Saidapet, Chennai | parveenn2002@gmail.com | +91 8220926566 | LinkedIn | GitHub

SUMMARY

Laravel/PHP backend developer with nearly 3 years of experience building and shipping 11+ production Fintech applications (PIVC and DVC platforms) and a School ERP. Strong in REST API development, MySQL database design, third-party API integration (PAN, Aadhaar, video consent) and production support. Hands-on with server deployment on GoDaddy and Git workflows on Bitbucket, from branching to release. Skilled in AI-assisted development with Cursor, Antigravity, ChatGPT, Claude, DeepSeek and Copilot, using prompt engineering for code generation, debugging, optimization and documentation. Open to Laravel Developer, PHP Backend Developer and AI-assisted / AI Engineer roles.

TECHNICAL SKILLS

Backend: PHP, Laravel, REST API Development, API Integration, Authentication, Role-Based Access Control, CRUD, Business Logic, ERP Module Development

Frontend: HTML, CSS, JavaScript, jQuery, AJAX, Phaser, Basic React.js

Database: MySQL, SQL, Database Design, Query Optimization, Bulk Excel Data Import

Hosting & DevOps: GoDaddy Server Handling (deployment, hosting, maintenance), Production Support, Release Management

Version Control: Bitbucket, Git (code maintenance, branching, releases, team collaboration)

AI Tools: Cursor, Antigravity, ChatGPT, Claude, DeepSeek, GitHub Copilot

AI Skills: Prompt Engineering, AI-Assisted Code Generation, Debugging and Optimization, Rapid Prototyping

Testing & Other: Postman (API Testing), QA Collaboration, Multi-language Applications, Liveness and Smile Detection Flows

PROFESSIONAL EXPERIENCE

Junior Software Engineer | Anur Cloud Technologies, Chennai, TN **Aug 2023 – May 2026**

- Delivered 11+ production applications for leading Fintech clients: 5+ Pre-Issuance Verification Call (PIVC) apps and 6+ Digital Visiting Card (DVC) platforms, built with PHP, Laravel, MySQL, JavaScript and Phaser.
- **Server handling:** deployed, hosted and maintained applications on GoDaddy servers, and supported live releases, debugging and post-production monitoring.
- **Code maintenance:** managed source code, branching and releases on Bitbucket, and collaborated with team members and QA teams on production releases.
- Developed Laravel REST APIs for customer verification, onboarding, policy details, video consent, and PAN and Aadhaar validation.
- Built a School ERP with student management, authentication, role-based access control, reporting and database management using Laravel and MySQL.
- Designed MySQL schemas, tuned database operations and tested APIs with Postman before release.
- Built liveness detection, smile detection and customer verification flows, with multi-language support across applications.
- Used AI tools (Cursor, Antigravity, ChatGPT, Claude, DeepSeek, Copilot) with prompt engineering to speed up code generation, debugging, optimization, documentation and database design.

PROJECTS

School ERP (Main Project) | *PHP, Laravel, MySQL, JavaScript, GoDaddy, Bitbucket*

- Built a School ERP covering student management and administrative modules, with authentication, role-based access control, CRUD operations, reporting and database management.
- Deployed and hosted the application on a GoDaddy server; managed source control and team collaboration on Bitbucket.
- Used Cursor and Antigravity for AI-assisted development, debugging and rapid feature delivery.

Fintech Applications: PIVC and DVC | *PHP, Laravel, MySQL, REST APIs, JavaScript, Phaser*

- Worked with leading Fintech clients on 5+ PIVC apps and 6+ DVC platforms; focused on Laravel backend, REST API integration, database management, deployment and production support.

Pramerica PIVC

- Built Laravel backend modules for customer verification workflows, with REST APIs for customer validation, policy details and video consent.
- Implemented liveness detection, smile detection and the customer verification flow; tested APIs with Postman.

Ageas PIVC

- Developed and maintained Laravel APIs for customer onboarding and verification, with multilingual support and production bug fixes.
- Handled API validation, database optimization, deployment and post-production monitoring with QA teams.

SBLI Digital Life Certificate (DLC)

- Built Laravel modules for secure certificate generation, PDF creation and authentication; integrated PAN and Aadhaar verification APIs.

LICHFL Digital Visiting Card (DVC)

- Managed 2,000+ customer digital visiting cards; automated bulk Excel import and built REST APIs for dynamic customer data retrieval.
- Supported frontend rendering with Phaser and JavaScript.

Other Fintech and ERP Work

- Enhancements, API changes, UI improvements, bug fixes and production support for FGLI, Canara HSBC, Bandhan, RNLIC and ABSLI PIVC applications.
- Built ERP modules (Hotel Management, HRM, Inventory/Stock Management) with Laravel, MySQL and JavaScript, including authentication, role-based access and reporting.

EDUCATION

B.Sc. Computer Science | Bishop Heber College **Aug 2020 – Apr 2023**

CGPA: 8.0 / 10.0 | No backlogs

ADDITIONAL INFORMATION

Languages: English, Tamil

Coursework: Responsive Web Design (FreeCodeCamp)

Certifications: English Typewriting, Simplilearn Certifications

GitHub Projects: User Admin, ERP Module, Book Management

Achievements: Zonal Level Throw Ball Competition Winner
